

# What Would Mother Nature Drive?

**I** drive the Honda Civic Hybrid, the environmentally friendly car of the future available today. The Hybrid, with its electronic fuel cell technologies, will help you conserve energy and reduce emissions. Driving a Civic never felt so good—fill up your tank and travel up to 650 miles, and save your green!

**Be sure to tell them Mother Nature sent you.**

\*Estimated 650 mile range on a single tank of gas based on 2004 EPA mileage estimates. Use for comparison purposes only. Actual mileage may vary. Manual

transmission model only. ULEV model only. AT-PZEV model mileage range will be lower. Federal tax incentives may apply to your purchase and use of alternative fuel vehicles.
