Your User Group Name presents:

# A Close Look at SQL Statement Tuning

Date: Event Date

Contact: Contact Person

Time: 11:00 a.m. - 1:00 p.m. Location: Event Location

This presentation goes into considerable detail on the tuning of actual SQL statements. The attendee will understand the Oracle optimizer choices, the Explain Plan, and how to interpret the output of an Explain Plan. This presentation will also include a discussion on the differences of the various Explain Plan steps such as Merge-Join and Nested-Loop, when is it best to use each, etc. The Speaker also covers important init.ora parameter settings as well as some SQL Do's and Don'ts. This presentation is a MUST for anyone doing SQL statement level tuning.
