CIVIL AIR PATROL SAFETY RESPONSIBILITIES AND PROCEDURES

1. An activity or project safety officer will supervise each unit activity or project sponsored by the unit. If none is formally assigned, the OIC or the senior officer present will assume this role.
2. The activity or project safety officer should employ ORM principles:
 - Monitor the activity for hazards.
 - Reduce risk by evaluating dangers and probabilities and needs of the missions and advising the OIC of alternative methods.

Elizabeth R. Curry, LTC CAP
Commander
