

Dear Kris,

We are proud to award you this certificate of participation and training. You are now a more emergency response - ABLE crewmember.

I'm sure, like all of us, you hope you'll never need to use the skills you've learned in the AirCare training class. Nevertheless, you should now have the basic skills to confidently respond to a medical emergency, whether inflight or on the ground, and possibly save a life.

The AirCare™ Inflight Emergency Medical Training curriculum covered the following subjects:

- Bloodborne Pathogen Training
- Basic InFlight First Aid
- Cardiac Defibrillation
- Common InFlight Medical Problems
- Patient Assessment
- Cardio-Pulmonary Resuscitation (CPR)
- Management of Airway Obstructions
- Reporting Procedures

The keys to responding to an emergency are training, confidence AND good judgement! Please re-familiarize yourself with the manual, the procedures and the equipment aboard your aircraft, as frequently as is practical. To maintain your skills with the defibrillator, "hands-on" re-familiarization is required quarterly. The attached certificate is valid for a period of one year from the training date below, with documented re-familiarization, quarterly.

Thank you again for your attendance and participation.

Douglas B. Mykol, ND
President

Certificate of
PARTICIPATION AND TRAINING
Is Hereby Awarded To
Kris J. Hall
For Successful Completion of the
AirCare International
InFlight Emergency Medical Training Program
