

LONG BEACH CONVENTION & ENTERTAINMENT CENTER

Arena Lighting System

5/7/03

HOUSE LIGHTING

Mercury vapor and incandescent lighting throughout the ceiling. On/Off control only. This is operated on the floor in the Electrical office or up by the house sound mix position top of balcony section 215 located on the east side of the arena.

SPORT LIGHTING

(142) Musco mercury vapor and sodium vapor sport lighting fixtures. Two settings available. One for hockey and one for basketball. It takes approximately four minutes for the light to reach full intensity. This is operated on the floor in the Electrical office or up by the house sound mix position top of balcony section 215 located on the east side of the arena.

FOLLOWSPOTS

- (4) Strong Super Troupers 2000 watt Xenon Followspots from permanent high positions at the top of the "corners" of the arena.
- (2) Strong Super Troupers 2000 watt Xenon Followspots on wheels for use in other areas of the arena.
