

NCPI Audio Conference (12/14/04)

“Senate Bill 151 – Changes in Controlled Substance Prescribing: What You Need to Know on January 1, 2005”

EVALUATION Results

I liked...

- The Q&A session. That was most helpful.
- Knowing the data before it is in effect.
- The information was relative to changes in regulations.
- Simple registration, ease of use (phone bridge and emailed PowerPoint), ability to ask live questions, knowledgeable presenters, the price-registration, travel, room and board expenses compared to many conferences were just right!

I wish...

- It was directed a little more to nursing.
- It had discussed how it would impact nursing more.
- More new regulatory efforts could be implemented with this sort of straightforward kickoff.

I plan to...

- Attend other audioconference regarding this topic, especially regarding AB 30.
- Share it with my staff.
- Share the information with my team members.
- Use the new Rx pad for most all prescriptions, not just schedule II-V controlled substances as I think this would be a good direction. PAR process should help cut down on abuses present in some areas.

Other comments

- Thanks for your help regarding the attachments. Happy Holidays!
- Thank you for the updated info.
