

2000 DP107

Period: 2.7555 ± 0.0002
Amplitude: 0.19

Dates Observed: October 22, 2000
Number of Sessions: 1
Number of Observations: 108

Instruments: .55 meter F/5 SCT with a SBIG ST9e CCD Camera

Notes: These were observations contributed to an international collaborative project to observe the binary asteroid 2000 DP107 lead by Petr Parvec of Ondrejov Observatory in the Czech Republic. Six observatories contributed observations. These observations were obtained at MacLean Observatory at Lake Tahoe, California with Lee Snyder. For the night observed, no eclipse events were detected.

The charts above are extracted from Petr Parvec's website at:
