

(3443) Letsungdao

Plot for: 3443 Leetsungdao
0% Phase JD: 2452131.662945 (Corrected for light-time)

Period: 3.4400h \pm 0.0010h

Period: $3.44 \pm .02$

Amplitude: $0.30 \pm .04$

Dates Observed: August 9 to 11, 2001

Number of Sessions: 3

Number of Observations: 159

●	33 - 08/09
▲	34 - 08/10
▼	35 - 08/11

Instruments: .28 meter F/9 SCT with a SBIG ST9e CCD Camera

Notes: Letsungdao is a main-belt asteroid discovered by Purple Mountain Observatory at Nanking on 26 September 1979. It is named in honor of the theoretical physicist Tsung-Dao Lee.
