December 10	Sarah N4DDK***	KE5TQA
December 17	Mike KE5TQA***	AE5MZ
December 24	Christmas Eve	No Net
December 31	Mike AE5MZ*	K5KXS

As you can see you start out as Back Up Net Control one week and then you move up to Net Control the next week. PLEASE make arrangements to cover your assigned weeks with another member if you are not able to cover your assigned weeks.

Don't worry about making mistakes on the net as Net Control. This is a training net where we might make our mistakes and we can all learn from them. :o)

The last Thursday net of each month will be conducted as a simplex net on 146.46. We have no guarantee that the 147.38 repeater will be working if we have a major event so we need to work some simplex nets. (Remember you might hear a station that net control cannot hear and you will have to relay their information to net control.) So please program this frequency into all your VHF equipment.

On the last Thursday make our normal announcement on 147.38 that the Waller County ARES net will be conducted on the simplex freq. of 146.46 at 10 minutes and 5 minutes before the net starts. At 8:00 PM start the net on 146.46 by following the net script as normal. AFTER EVERYONE has checked in to the net announce that the net will be switching back to 147.38 for training and announcements. This makes it easier for all to hear the training and announcements.

73,
Ken Miller
